I'm a Web Design and Development student at Utah Valley University and the senior web editor at the UVU Review. I design websites and tools, then build them by vibe coding with Claude Code.

EDUCATION

Web Design and Development, B.S., Interaction and User Experience Design Emphasis

Utah Valley University, Orem, UT | Anticipated graduation: May 2027 | Cumulative GPA: 3.58

EXPERIENCE

UVU Review, Senior Web Editor

2026 to current | Junior Web Developer in the 2025–2026 school year

- Redesigned the uvureview.com homepage so the top stories fill the first screen, ranked automatically by recency, reads and comments.
- Designed one menu panel that works at every screen size, replacing separate desktop and mobile menus.
- Cut 20.6 KB of unused styles and a 98 KB script from every page, and fixed broken guest-writer links.
- Rewrote and rebuilt the About, Advertise, Contact and Work for Us pages.
- Built these changes by vibe coding with Claude Code, reviewing and testing each one on the site.

Utah Valley University, Excellence and Innovation Initiative (E2I), Web Designer

2025

- Helped organize and facilitate UVU contracts on the corresponding websites.
- Designed the Chuck Rack store in Figma, built it in Shopify, then rebuilt it on a new theme as paid work.

PROJECTS

UVU CET Website Redesign, Interaction Design, Spring 2025

- Took a college website from sketches and wireframes to a clickable Figma prototype, refined after two rounds of eye-tracking tests.

Class websites, DWDD 1600, 1720 and 2610

- Built responsive sites in HTML, CSS, SCSS and JavaScript, including JSON and weather API projects.

SKILLS

UX and design: UX/UI prototyping in Figma (20+ projects, including 5 full UI mockups) and Adobe XD; typography, color theory and layout; responsive web design and design systems

Vibe coding: building websites and tools with Claude Code; reviewing and testing AI-written code

Tools: Adobe Photoshop, Illustrator and InDesign; WordPress; Shopify

Code: HTML and CSS (intermediate), SCSS, JavaScript (basic)
